CAREER OBJECTIVE

Seeking a Full Stack Developer / Software Engineering internship to apply my frontend and backend skills in building efficient applications. I aim to contribute through clean code, teamwork, and innovative problem-solving to support organizational goals. This opportunity will help me gain hands-on experience by working on meaningful, real-world projects.

WORK EXPERIENCE

Software Development Intern – Bluestock Fintech *Jun 2025 – Jul 2025*

- Developed a full-stack web platform using the **MERN** stack with responsive UI components.
- Collaborated in an **Agile environment** using Git for version control, feature branching, and code reviews, while contributing to debugging, and performance improvements across frontend and backend.

ACADEMIC PROJECTS

Yuktah – Smart Healthcare & Emergency Management Platform *Jan 2026 – Present*

- Tech Stack:** Next.js, TypeScript, MongoDB
- Project Description:** A smart healthcare platform designed to manage patient data and emergency situations by enabling fast, secure access to critical medical and hospital information through dashboards and QR-based systems.
- My Contribution:**
- Built the Patient Dashboard and implemented an Emergency QR Code system for secure access to patient and hospital information.
- Integrated Patient and Hospital Dashboards with backend services for the Admin Dashboard, ensuring consistent data flow, shared authentication logic, secure data handling, and smooth role-based navigation.

Sahyaatra – Intelligent Trip Planning & Co-Travel Network *Aug 2025 – Dec 2025*

- Tech Stack:** React, TypeScript, Express.js, Convex, Gemini API
- Project Description:** An intelligent trip planning and co-travel platform that allows users to create trips, discover co-travelers, and generate personalized itineraries using AI-driven recommendations.
- My Contribution:**
- Developed responsive React.js and TypeScript components for trip creation, co-traveler discovery, and itinerary display using state-driven UI flows.
- Integrated the Gemini API to generate and display personalized travel itineraries, enabling users to create, join, and manage trips.

CABU – University Ride-Sharing Platform *Feb 2025 – Apr 2025*

- Tech Stack:** MERN Stack, SendGrid
- Project Description:** A university-focused ride-sharing platform designed to help students efficiently create, join, and manage shared rides with automated communication.
- My Contribution:**
- Implemented frontend and backend features for creating, joining, and managing rides using the MERN stack.
- Integrated SendGrid for automated email bookings, confirmations, and ride status updates.

EDUCATION

2023 – Present	B.Tech in Computer Science & Engineering, Bennett University	(CGPA: 9.69/10)
2023	Class XII, Balaji Junior College	(96.9%)
2021	Class X, Nirmala High School	(100%)

TECHNICAL SKILLS

Web Dev	MERN, Next.js, Node.js, Express.js, Tailwind CSS, REST APIs
Cloud & DevOps	Docker, AWS, Microservices Architecture
UI/UX	Figma, Wireframing, Basic Prototyping, Simple UI Design
Languages	C++, Java, Python
Core CS	Data Structures & Algorithms, OOPS, OS, DBMS, CN
Databases	MongoDB, MySQL, PostgreSQL
Tools	Git, GitHub, Postman, Jira

ACHIEVEMENTS

- Secured **6th place** in Smart BU Hackathon 2025 in Travel & Tourism domain.
- Achieved **3rd position** in *Project Showcase 2.0* for innovation and technical execution.
- Included in the **Dean's List** for consistent academic excellence.
